

PARR ADHESIVE PAD

For Surface Mount Road Signs

Features:

- **The new PARR Adhesive Pad** was developed specifically for the surface mount channelizer post and road marker industry. It is made up of high strength rubber and buytl compounds to withstand the harshest of road conditions.
- **High Impact Resistance** – The PARR Adhesive Pad is proven to withstand high impact and not lose its adhesion to asphalt and other pavement type materials.
- **Easy Installation** – The adhesive pad is ready to use and is the fastest way to adhere any surface mount post or marker. No cure time or mixing required.
- **PARR Technologies** offers what many of our competitors will not. PARR will customize the dimensions of the PARR Adhesive Pad to almost any dimension.
