

PARBOND™ Rubber-based Sealant

SC-0271 White
SC-0272 Aluminum
SC-0273 Clear

DESCRIPTION

PARBOND is a weather-resistant, rubber-based sealant for small joints or gaps up to 1/8" between metal, glass, masonry, and wood. It provides moisture resistance and weather protection through temperature variations, flexing and moderate elongation and compression. It sets up by evaporation of solvent to a tough flexible bead. An initial surface film forms in one hour, but final cure will take 24 to 72 hours, depending on the thickness and ambient temperature. Cured film will withstand exposure to weather, temperature extremes of -20°F to 180°F, water, water vapor and air pressure. This sealant is formulated to meet AAMA 803.1-92, Type II Specification for narrow joint seam sealers.

PRODUCT USES

PARBOND can be used within the opening or as a surface coating over very fine cracks. Typical applications are: miter joints in window or door frames, needle glazing, top dressing over non-dry sealants to avoid dirt pick up. It can be a sealant for rain gutters and downspouts, around automotive windshields and back lights, and for sealing of sinks, tile and ducts in kitchens, galleys, and bathrooms.

TYPICAL PHYSICAL PROPERTIES and GENERAL INFORMATION

Property	SC-0271 Value	SC-0272 Value	SC-0273 Value
RAW MATERIAL BASE	SYNTHETIC RUBBER	SYNTHETIC RUBBER	SYNTHETIC RUBBER
COLOR	WHITE	ALUMINUM	CLEAR, COLORLESS
SPECIFIC GRAVITY	0.98	0.96	0.94
ELONGATION @77° F	300%	300%	300%
WEIGHT PER GALLON	8.23 POUNDS	8.23 POUNDS	7.47 POUNDS
SOLIDS BY WEIGHT	60%	60%	59%
FLASH POINT(TAG CLOSED CUP)	45° F (7° C)	45° F (7° C)	40° F (4° C)
TACK-FREE TIME (RT/50% RH), ¼" BEAD	30 MINUTES	30 MINUTES	30 MINUTES
FULL CURE TIME	24-72 HOURS	24-72 HOURS	24-72 HOURS
VISCOSITY	35,000 CPS	35,000 CPS	47,000 CPS

VOC	415 G/L	415 G/L	368 G/L
PHOTOCHEMICALLY ACTIVE	YES	YES	YES
SHELF LIFE	ONE YEAR	ONE YEAR	ONE YEAR
SERVICE TEMPERATURE	-20°F(-29°C) TO 180°F(82°C)	-20°F(-29°C) TO 180°F(82°C)	-20°F(-29°C) TO 180°F(82°C)
FLEXIBILITY @ -20° F (-7° C) OVER ¼" MANDREL	NO CRACKING, CHECKING OR ADHESION LOSS	NO CRACKING, CHECKING OR ADHESION LOSS	NO CRACKING, CHECKING OR ADHESION LOSS
COVERAGE 1/8" BEAD	1562 LINEAR FT/GAL	1562 LINEAR FT/GAL	1562 LINEAR FT/GAL
WATER RESISTANCE	EXCELLENT	EXCELLENT	EXCELLENT
HEAT RESISTANCE	2 HR @300°F (149°C)	2 HR @300°F (149°C)	2 HR @300°F (149°C)
100% HUMIDITY	NO EFFECT	NO EFFECT	NO EFFECT
CLEAN-UP SOLVENT	TOLUENE, XYLENE, MEK, ETHYL ACETATE, PROPYL ACETATE		
FORM & PACKAGING	DRUMS; 5-GAL PAILS; 1-GAL CANS; 11 OZ CARTRIDGES; 5 OZ TUBES		

EQUIPMENT SUGGESTIONS

CAULKING GUN if packaged in cartridges.

25:1 PUMP WITH FOLLOWER PLATE if packaged in 5-gal. or 55-gal. drums.

APPLICATION TECHNIQUES

1. Surfaces to be sealed should be clean, dry and free of oil and moisture. Sealant can be applied over well-cured, hard, and thoroughly secure paint film. However, soft films or those with questionable adhesion, should be removed.
2. Apply the sealant through a Plews gun or similar flow gun, or from a collapsible tube, cartridge or plastic squeeze bottle.
3. Apply a small bead. If the opening is sufficiently large, force a small amount of the sealant into the joint. Bridge small openings at least 1/8" on each side. Apply in a smooth bead and allow to level. Do not attempt to tool the surface.
4. Do not handle, move, or pack for one hour until a surface film has formed.
5. Clean hands and tools with mineral spirits.

STORAGE AND HANDLING

The shelf life of this product is 1 year, when stored at 60-80°F in original sealed container. If stored below 60°F, the product should be conditioned in its unopened container, at room temperature for at least 24 hours before using.

WARNING! FLAMMABLE LIQUID AND VAPOR. VAPOR MAY CAUSE FLASH FIRE.

PRECAUTIONS

Vapors may ignite explosively and cause flash fire if they contact an ignition source. Vapors may settle in low-lying areas or travel long distances to an ignition source. Ensure industrial ventilation systems are on and functioning properly, or use sufficient general dilution ventilation to maintain vapor concentrations below recommended exposure limits. Keep away from heat, spark, or open flame, including pilot lights, lighters or electric switches. Disconnect all gas or electrical appliances, e.g., furnaces, heaters, power tools, until all vapors have been cleared from the area. Static charges can accumulate during shipping, unloading, pouring or conveying. Ground and bond container receiving equipment and personnel before transferring material. Do not generate static sparks (such as by walking on carpet, etc.). Keep container closed during and after use. Empty container may contain vapors - do not cut, drill, grind, or weld on or near this container.

Vapors harmful. Acute overexposure to vapors may cause dizziness, headache, nausea, and unconsciousness. Prolonged overexposure to vapors may cause liver and kidney damage. Absorbed through the skin. Harmful if swallowed. Eye and skin irritant.

WARNING: This product contains toluene, a chemical known to the State of California to cause birth defects or other reproductive harm.

NOT INTENDED FOR CONSUMER SALE OR USE. FOR INDUSTRIAL USE ONLY.
